Domus 3 Arenaria

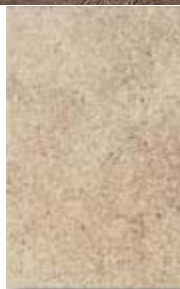

Domus 6 Brunita

Domus 7 Aurea

12" x 12" & 18" x 18"

8" x 12"

4" x 4"

3" x 8" Listel

2" x 8" London

3" x 13" Bullnose

3" x 8" Bullnose

DOMUS is a line inspired by the travertine stones from the province of Siena and by their fascinating structures. An untouched gift of the enchanting atmosphere of the Roman Domus. Deep, intense colors merge to create a line of floors and walls of porcelain, featuring irregular veins and textures that render the surfaces more unique and luxurious.
domus arenaria reminiscent of silvery sand
domus brunita the color of walnut
domus aurea the color of golden oak

PEI Rating (Porcelain Enamel Institute): An industry standard used to rate the durability of the glaze, and the tiles ability to resist surface abrasions. This durability provides guidelines on where a tile can be used.

| | | |
|---------|----------------------|---|
| PEI I | Light Traffic | Residential bathrooms and all interior wall applications. |
| PEI II | Medium Traffic | Residential interior areas, except entryways, kitchens, stairs, and pivot points. |
| PEI III | Medium Heavy Traffic | All residential and very light commercial applications. Not recommended for commercial entryways. |
| PEI IV | Heavy Traffic | All residential and most commercial applications, including shopping malls and most public areas. |
| PEI V | Heavy Plus Traffic | All residential and all commercial applications, where extra heavy duty wear ability is required. |

Shade and Texture Spectrum (STS or V rating): Ceramic tile is made of natural materials. Color, shade and finish variations may exist due to the inherent characteristics of ceramic tile. Many tiles are produced with these characteristics to achieve a certain look. This rating will inform you of the amount of shading and texture variations built into the product.

| | | |
|-------------|------------------|--|
| STS 1 or V1 | Low Shading | The least amount of shade and texture variation obtainable in naturally fired clay products. |
| STS 2 or V2 | Moderate Shading | A gentle mist of random color, shading and texture variations will be inherent to the glaze. Slight variations will be apparent from one piece to the next. |
| STS 3 or V3 | High Shading | The tones and textures will vary greatly from one piece to the next. Variations in shading and texture will be apparent from one piece to the next. |
| STS 4 or V4 | Random | Extremely high shade and texture variations will be apparent within each carton of materials. The material will vary greatly from one piece to the next for unprecedented realism. |

| PRODUCT | COLOR | PEI RATING | STS RATING |
|---------|-------|------------|------------|
| Domus | All | IV | 3 |

Meets or exceeds recommended guidelines for American with Disabilities Act for horizontal surfaces. (Coefficient of Friction .6 wet or greater)
